

The Macomb County Planning and Economic Development Department has been busy preparing a countywide parcel based Geographic Information System (GIS) and highly accurate, high-resolution digital orthophotography. A meeting has been scheduled to describe what products are available, where we are presently with GIS and where we are heading in the future.

Macomb County Board of Commissioners

John C. Hertel, ChairmanDistrict 14
Ralph A. Liberato, Vice-ChairmanDistrict 1
Marvin E. Sauger, Sergeant-at-Arms District 2

GIS/Digital Orthophotography Meeting

Friday, November 9, 2001

1:30 p.m.

Freedom Hill County Park

15000 Metropolitan Parkway (16 Mile Rd.)
Between Schoenherr and Utica Rd.

HIGHLIGHTS

- Learn about Geographic Information Systems (GIS) and the Macomb County Parcel Based GIS.
- See the year 2000 digital orthophotography and learn about its capabilities:
 - B/W Digital Orthophotography
 - Road Centerline/Address Coverage
 - Hydrography Coverage
- The fee schedule for digital and hardcopy products will be discussed.
- Licensing agreements for digital data sets are required and will be reviewed at the meeting.
- A description of the options for paper orthophotography and matching property line maps will be presented.

We encourage anyone who works with data that has a spatial component (address/Tax-ID#/X-Y Coordinates) to attend this informational meeting.

For more information and sample products please visit the County's GIS website at www.co.macomb.mi.us/gis.
